

2019 HEAT PUMPS REBATE INFORMATION SHEET

GENERAL INFORMATION

- No other San Miguel Power Energy Efficiency Product or special rate/discount shall apply.
- Applies only to permanent installations that are purchased by, or leased to, the member.
- Minimum qualifying load for terminal unit heat pumps is 12,000 BTU/hr. rated capacity and 2 tons for Energy Star units.
- Heat pump credits apply to new and replacement installations.
- A one-time additional payment per unit is available for heat pumps two tons and larger meeting or exceeding Energy Star ratings.
- An Energy Efficiency Products Application/Certification is required.

EFFICIENCY STANDARDS

- Efficiency standards are applicable to all heating types.
- Heat Pumps shall meet minimum Federal efficiency levels for the base incentive. For units of 2 tons and over an additional incentive is offered for Energy Star listed equipment.
- Energy Star Rating – A complete list of qualified equipment is available at www.energystar.gov (Products -> heating and cooling -> heat pumps).

PAYMENTS

- \$ 85/UNIT for terminal units (PTACs similar to the typical under-window hotel room units)
- \$300/ TON for units rated from 15 to 17 SEER.
- \$450/ TON for units greater than 17 SEER.
- \$100/ unit additional incentive for central air source with integrated controlled ETS backup in lieu of separate ETS incentive.
- \$500/ TON for central ground or water source.
- \$100/UNIT additional incentive for central air source with integrated controlled ETS back up.
- \$100 per UNIT for split system Energy Star rating air conditioners 15 to 16 SEER.
- \$150 per UNIT for split system Energy Star rating air conditioners over 16 SEER.
- Additional rebates for waste heat water heating may apply.
- Note: There is no separate payment for electric resistive heat back up.
